Dear Mrs P,  
Thank you for having us. We really enjoyed it! Thanks for sharing citizenship with us.  
The best thing was when we saw the centipede's gony under the lectrick white board.  
I hope I can come again.

Dear cathy,  
I loved the trip it was really interesting because I have never looked in a microscope. When I looked in, it was really really scary, green and exciting, and the water was kind of polluted and kind of healthy too.

The best part was the pond-dipping because when you had to do the swirl it was like doing a dance in water. And the center was very well organised too.

For me I thought that when the spider came out of the big stone the one that looked hairy, brown, bestly, and enormous.

Thankyou very much
